1. What is your connection or interest in this case? * For example, are you a customer of the Company that is the subject of this pending proceeding? (This section must be completed. Attach additional information if necessary.)

I am a Dominion customer who owns a rooftop solar system and participates in the net metering program.

2. Please give a concise statement of your protest. * (This section must be completed. Attach additional information if necessary.)

I am protesting Dominion's new and increased fees for solar rooftop customers. The proposal is unfair to solar customers for many reasons, including the arbitrariness and punitive nature of the increase.

The point I want to emphasize though, is that in attempting to balance the costs of maintaining the State's power grid between solar customers and other utility customers, Dominion is ignoring the enormous investment costs solar customers made to expand the size and capability of the power grid over which Dominion has a monopoly. In short, solar customers invested their own money and bore personal financial risk to increase the size and environmental friendliness of Dominion's power grid. When deciding who pays their fair share to maintain the power grid, please consider the size of our investments, upkeep costs, and risks that we continue to bear, which directly benefits Dominion through increased capacity and production source diversity.

3. Do you wish to make an appearance at a hearing in this proceeding, if scheduled, and offer sworn testimony? *

No, but thank you for your consideration of my protest.
